Hand Grenade explosion on Avenue Road.

Detectives have continued enquiries in the vicinity of the explosion, but have been unable to obtain any further information.

It is possible that the grenade was thrown with the intention of intimidating the owners of Repair Garages near the spot, detectives having noted Japanese owned motor cars being repaired there on several occasions in recent weeks, but enquiries there have failed to confirm this.

At 10am. on 10/5/38 a telephone message was received from the Paulun Hospital reporting that the female named Tsih Tung Sa had died there at 9am. same date as a result of the injuries she had received in the bombing.

The body has been removed to the Public Mortuary pending an inquest which will be held on 11/5/38.

backed by a low wall, and would be a Cul-de-sac but for a short lane running behind the lock-up garages and the wall.

An examination showed a small hole in the cement to the West side of the dust-bin, numerous dents in the low wall and in an old motor car parked on the land. Near the scene of the explosion were found two wooden splinters, similar to that of bombs of the "Potato Masher" type. Six cast-iron fragments were also found.

C.P.C. 2025 when questioned stated that he had been on duty at the corner of Carter Road and Avenue Road and that he had run to the scene when he heard the explosion. He had seen the injured persons sitting or lying on the pavement and had then called the Station by telephone.

C.D.S. 72 and the undersigned visited the Paulun Hospital and questioned the injured persons, but they were unable to give any useful information, they having been injured when passing the scene of the explosion.

The wall at the rear of the Dust-bin in the North boundary of the Hu Kwang (胡光) Middle School, Lane 41, No.48-50 Carter Road. This School was visited by detectives and the Principal, Mr. Nieu Sah Ching (倪石清) was questioned, the following information being obtained:-

About 200 students are enrolled there, their ages being between 12 years and 20 years. Only seven students

reside on the premises.

A window on the first floor, about 18 feet from the ground, was broken, either by fragments of the grenade of by the concussion. No persons were injured inside the School.

The Principal was questioned, but was un-able to give any information which would suggest that the missile was thrown with the intention of intimidating him or any of his staff. He states that he has not received any threatening letters and that he does not deal in politics.

There are nine tenants in the School buildings, as follows:-

- (1) Sung Poh Yeu (陸福之), Clerk employed in the Central Savings Society.

All of these persons were questioned, but could not supply any information likely to assist in investigations.

Despite thorough enquiries on the scene, no witnesses to the actual bombing could be found, and the motive is still obscure, although it is possible that the object was to intimidate the Principal of the School, for some reason not disclosed by him.
